

Draft Grant Application

BrightPath Community Foundation — 90% Completeness Test

Applicant Information

Organization: BrightPath Community Foundation
Organization type: Registered nonprofit organization
Established: March 15, 2019
Project contact: Ananya Mehta, Program Director
Email: ananya.mehta@brightpath.example

Project Description

BrightPath Community Foundation proposes a 12-month Digital Skills Growth Program for young adults aged 16–24 from low-income communities. Activities include weekly computer-skills classes, internet safety workshops, productivity-software training, and introductory coding sessions. The program will operate at three community centers and aims to improve participants' digital confidence and practical skills.

Project Timeline

Start date: January 15, 2027
End date: January 14, 2028
Milestones: Participant recruitment in Month 1; training delivery in Months 2–10; final skills assessment and impact report in Months 11–12.

Project Outcomes and Monitoring

The project expects to serve approximately 600 participants. Progress will be measured through attendance records, participant feedback surveys, and pre- and post-program digital-skills assessments. The team will review attendance monthly and conduct formal outcome reviews at Months 6 and 12.

Budget

Expense	Amount
Instructor fees	\$24,000
Training materials	\$8,000
Community center costs	\$9,000
Laptops and equipment	\$18,000
Program administration	\$6,000
Monitoring and evaluation	\$5,000
Contingency	\$5,000
Total	\$75,000

Use of Grant Funds

The requested \$75,000 will fund instructor fees, training materials, community-center costs, laptops and equipment, program administration, monitoring and evaluation, and contingency costs as detailed in the

project budget.

Organizational Experience

BrightPath has operated continuously since March 2019 and has delivered community technology workshops since 2020. The organization is a registered nonprofit.

Financial Information

The organization has supplied its 2025 financial statement with this application.

Annual Report

The organization's latest annual report is referenced in the application materials but is intentionally not included in the supplied supporting-document package for this test.

Previous Community Impact

During the previous two years, BrightPath reports that it has helped more than 8,000 young people through community technology programs. This statement is included as a claim in the application; no separate impact report is supplied in this test package.

Risk Management

The main implementation risks are participant attendance and equipment availability. BrightPath will reduce attendance risk through reminder messages and flexible session times, and will maintain spare equipment to reduce disruption caused by device failures.

Test Design

This fictional application intentionally satisfies 9 of the 10 mandatory requirements. The latest annual report is the single mandatory supporting document intentionally missing. The application also contains an unsupported prior-impact claim so the system can test both completeness scoring and unsupported-claim detection.
